

Subject Index to Volume 12

A

Acetaldehyde

effects on bronchial epithelial cell migration and matrix attachment, L723

Acetylcholine

effects on $[Ca^{2+}]_i$ in submucosal nasal gland acinar cells, L361
release from airway smooth muscle nerve endings, effects of substance P and vasoactive intestinal peptide, L432
release from equine airway parasympathetic nerves, catecholamine effects on, L368
release from tracheal parasympathetic nerves, β -adrenoceptor effects on, L950
release in bronchial smooth muscle, effects of prostaglandins and thromboxane A_2 analogue, L47

Acidosis

role in hypoxic and hypercapnic airway smooth muscle relaxation, L207

Acrolein

effects on bronchial epithelial cell migration and matrix attachment, L723

Actin

role in pulmonary capillary integrity, L753

Actin filaments

role in hypoxia-stimulated capillary network formation in lung microvessel endothelial cells, L789

Adenosine 3',5'-cyclic monophosphate

see also **Protein kinases, PKA**
in airway smooth muscle cells (review), L1
airway smooth muscle relaxation from, role of sarcoplasmic reticulum Ca^{2+} ATPase, L407
endothelin-1 effects on production in alveolar epithelial cells, L192
non-role in anesthetic-induced airway smooth muscle relaxation, L166
production in airway epithelial cells, tannin effects on, L851
role in surfactant protein B gene transcription and mRNA levels in fetus, L481

Adenosine 5'-triphosphate

levels in type II cells, effects of H_2O_2 , L129
regulation of lung surfactant secretion, role of protein kinase C, L108

Adenosine 5'-triphosphate receptors

role in nucleotide-stimulated leukocyte adherence to pulmonary artery endothelial cells, L666

α -Adenosine receptor antagonists

effects on ischemia-reperfusion lung injury, L1036

Adenovirus

as vector for gene transfer
to bronchial submucosal glands for cystic fibrosis therapy, L657
to fetal lung cells, L839

Adenylate cyclase

in airway epithelial cells, tannin effects on, L851

Adenylylcyclase-linked receptors

in airway smooth muscle cells (review), L1

Adrenal hormone

role in extracellular matrix synthesis by type II cells, L885

Adrenergic-adenosine 3',5'-cyclic monophosphate signal transduction pathway

tannin effects on, L851

β -Adrenergic agonists

effects on acetylcholine release from tracheal parasympathetic nerves, L950
modulation of Na^+ - K^+ -ATPase in type II alveolar cells, L983

α -Adrenergic receptors

α_2 -inhibitory, role in airway cholinergic nerves, L368

β -Adrenergic receptors

and airway smooth muscle contraction, role of G proteins and calcium-activated K channels, L221

β_2 -excitatory, role in airway cholinergic nerves, L368

β_2 , pulmonary, glucocorticoid effects on transcription rate, L41

α_1 -Adrenergic stimulation

of sodium chloride (potassium) cotransport in airway epithelial cells, role of protein kinase C, L414

Adult respiratory distress syndrome

endotoxin effects on cultured human pulmonary artery endothelial cells, L239

hydrogen peroxide effects on surfactant biosynthetic enzymes, L29

and iron-derived reactive oxygen species, lung endothelial heme as iron source, L321

leukotoxin vasodilation in pulmonary circulation, L123

pentoxifylline effects on pulmonary neutrophil kinetics, L27

Aging

survival time response to 100% oxygen, L539

Airway

see also *individual components and*

Muscle, smooth, airway

auxotonic changes in caliber, measuring by computerized videomicroscopy of microexplants, L519

ciliary motility

C-type natriuretic peptide effects on ciliary beat frequency, L1021

ethanol effects on, role of nitric oxide, L596

nitric oxide-dependent, effects of TNF- α and IL-1 β , L911

distal, transepithelial Cl^- secretion and submucosal gland number, L526

endothelin ET_A and ET_B receptors, antagonist effects in guinea pig, L846

eosinophil chemotaxis in and narrowing of, effects of inhibiting 5-lipoxygenase and cyclooxygenase, L446

epithelial barrier function, oxidant effects on permeability and repair, L284

epithelial cells

adenovirus-mediated gene transfer in human fetal lung ex vivo, L839

α -adrenergic-stimulated NaCl(K) cotransport in, role of protein kinase C, L414

cAMP production and adenylate cyclase activity, tannin effects on, L851

human CC10 gene expression and evidence of link to asthma, L565

human, in vitro culture systems (review), L347

interleukin-8 from, *Staphylococcus aureus* stimulation for neutrophil recruitment, L85

proliferation in coculture with dorsal root ganglion cells, L957

secretory leukocyte protease inhibitor in, corticosteroid effects on, L601

surface and submucosal glands, adenovirus-mediated transgene delivery, L657

hyperresponsiveness

antigen effects on bronchial parasympathetic ganglia, L879

in asthma, and vasoactive intestinal peptide effects on airway smooth muscle cell proliferation, L1047

increased muscarinic receptor expression in Basenji-greyhound dog, L935

role of myosin light-chain kinase activity, L739

role of PKC in nonsensitized and passively sensitized bronchial smooth muscle, L966

maturation, dexamethasone effects on tropoelastin expression in fetal lung, L491

neuropeptide receptor distribution, L584

nonadrenergic noncholinergic inhibitory system, respiratory syncytial virus effects, L1006

parasympathetic nerves, acetylcholine release from, catecholamine effects on, L368

smooth muscle nerve endings, acetylcholine release from, effects of substance P and vasoactive intestinal peptide, L432

tone, regulation by CO_2 , role of pH_i effects on tracheal smooth muscle voltage-dependent Ca^{2+} channels, L642

Allergy

antigen effects on bronchial parasympathetic ganglia, role of histamine H_1 receptors, L879

ozone effects on mast cells, L902

respiratory IL-8-induced transcellular eosinophilic chemotaxis, L117

simultaneous study of chemoattraction and bronchoconstriction in guinea pig tracheal explants, L446

Alveolar cells

macrophages, effects of surfactant protein A and bacterial endotoxin, alone and combined, L144

Alveolar cells (continued)

type I, protein rTl₄₀, use as marker of lung injury, L181

type II

β -adrenergic agonist modulation of Na⁺-K⁺-ATPase, L983

asbestos-induced injury, role of reactive oxygen species and DNA strand breaks, L471

cystine transport system and glutathione regulation, L21

early postnatal development, effects of indomethacin on, L56

effects of surfactant protein A and bacterial endotoxin, alone and combined, L144

extracellular matrix synthesis, role of adrenal hormone, L885

extracellular matrix turnover kinetics, L336

fetal, differentiated, effect of O₂ dose on surfactant proteins and phospholipid production, L818

fetal, inflammatory mediator-induced nitrate and nitrite production in, L501

fetal, ion-transporting phenotype, governing role of fetal extracellular matrix, L762

oxidant injury to, surfactant protein A-carrying, pH-sensitive liposomes for antioxidant delivery, L374

oxygen-induced hyperplasia, role of basic fibroblast growth factor and its receptor, L455

proliferation after hypoxic injury, role of A- and D-type cyclins and cyclin-dependent kinases, L625

surfactant biosynthetic enzymes, effects of H₂O₂, L129

surfactant secretion, regulation by ATP, role of protein kinase C, L108

Alveolar macrophages, see Macrophages, alveolar**Alveoli, see Lung, alveoli****Anesthetics, see Volatile anesthetics****Angiogenesis**

hypoxia-stimulated capillary network formation in lung microvessel endothelial cells, L789

Angiotensin II

pulmonary vascular bed responses to, effects of PKC inhibitors on, L532

Angiotensin II receptors

AT₁ vs. AT₂, role in vasopressor responses to angiotensin peptides, L302

Angiotensin peptides

ANG IV, effects on pulmonary vascular bed, vs. other vasoactive peptides, L302

pulmonary vascular bed responses to, effects of PKC inhibitors on, L532

Antigen

effects on lung after sensitization, attenuation by neurokinin depletion, L781

mechanism of bronchial action, L879

Antioxidant enzymes

in bronchial epithelial cells, effects of cytokines on, L71

delivery to pulmonary epithelial cells via surfactant protein A-carrying, pH-sensitive liposomes, L374

Antioxidants

role in survival time response to 100% oxygen and effects of aging on, L539

 α_1 -Antitrypsin

alveolar concentration, effects on light vs. heavy surfactant metabolic subtypes, L438

Aorta

role of calcium-activated potassium channels in NO-mediated relaxation, L152

Arachidonic acid

tannin-mediated release from macrophages, role of calcium influx, L33

Arsenite

effects on cystine transport and glutathione levels in alveolar type II cells, L21

Arteries, see specific arteries**Asbestos**

pulmonary epithelial cell injury from, role of iron-catalyzed free radicals and DNA strand breaks, L471

Asthma

airway hyperreactivity, role of myosin light-chain kinase activity, L739

airway smooth muscle cell proliferation, vasoactive intestinal peptide effects on, L1047

cultured airway myocytes for airway smooth muscle studies (review), L1

glucocorticoid effects on pulmonary β_2 -adrenoceptor transcription rate, L41

increased muscarinic receptor expression in Basenji-greyhound dog, L935

interleukin-8-induced transcellular eosinophilic chemotaxis, L117

possible chromosomal linkage of human CC10 gene, L565

simultaneous study of chemoattraction and bronchoconstriction in guinea pig tracheal explants, L446

subepithelial connective tissue deposition in, and neuropeptide effects on lung fibroblasts, L278

Atopy

possible chromosomal linkage of human CC10 gene, L565

Atrial natriuretic peptide receptors

gene expression in lung, effects of hypoxia on, L328

Atropine

effects on nasal gland acinar cell [Ca²⁺]_i response to acetylcholine, L361

B**Bacteria**

phagocytosis by alveolar macrophages, effects of surfactant protein A and endotoxin, alone and combined, L144

Barrier function

of pulmonary artery endothelial cells, mechanisms of disruption by pertussis toxin, L926

of pulmonary capillary endothelial cells, role of actin microfilaments, L753

of tracheal epithelium, oxidant effects on permeability and repair, L284

Basic fibroblast growth factor

and its receptor, gene expression in lung after 85% O₂, L455

role in hypoxia-stimulated capillary network formation in lung microvessel endothelial cells, L789

Birth, see Newborn**Botulinum C₂ toxin**

pulmonary edema from, role of endothelial cytoskeleton, L753

Brain

respiratory nuclei
connections with sleep-causing pontine reticular regions, L251
muscarinic receptor subtypes, L941

Breathing, see Respiration**Bronchi****Bronchi, see also Muscle, smooth**

distal small, transepithelial Cl⁻ secretion and submucosal gland number, L526

epithelial cells

cigarette smoke effects on migration and matrix attachment, L723
cytokine-induced superoxide dismutase effects on later oxidant exposure, L71

fibronectin production, effects of insulin, L230

stimulatory effects of hepatocyte growth factor and changes in neoplasia, L1012

virus effects on migration and matrix attachment, L214

hypoxia-induced relaxation, role of Ca²⁺ entry inhibition, L201

muscarinic receptor subtype distribution and effects on adenylyl cyclase, L101

parasympathetic ganglia, antigen effects on, role of histamine H₁ receptors, L879

role of cyclooxygenase products in neuroeffector control and airway hyperresponsiveness, L47

Bronchial asthma, see Asthma**Bronchioles**

transepithelial Cl⁻ secretion and submucosal gland number, L526

Bronchitis

viral, re-epithelialization after, virus effects on epithelial cell migration and matrix attachment, L214

Bronchopulmonary dysplasia

pH-sensitive liposomes for antioxidant delivery to type II cells, L374

Bumetanide

effects on distal airway short-circuit current, relation to submucosal gland number, L526

Butyrate

as possible cystic fibrosis therapy by inducing overexpression of $\Delta F508$ mutant, L615

Byssinosis

tannin effects on cAMP production and adenylate cyclase in airway epithelial cells, L851
tannin-mediated calcium influx in alveolar macrophages, and arachidonic acid release, L33

C**C-type natriuretic peptide**

in airway, effects on ciliary beat frequency, L1021

Cage mechanism

in peroxydinitrite chemistry, L699

Calcitonin-gene-related peptide

effects on human lung fibroblast proliferation and chemotaxis, L278

Calcium-ATPase

of sarcoplasmic reticulum, role in cyclic nucleotide-induced airway smooth muscle relaxation, L407

Calcium channels

L-type, role in cyclic nucleotide-induced airway smooth muscle relaxation, L407

role in mechanisms of mesothelial cell

Ca^{2+} mobilization, L63

voltage-dependent

and hypoxic and hypercapnic airway

smooth muscle relaxation, L207

role in hypoxia-induced airway smooth muscle relaxation, L201

in tracheal smooth muscle, effects of volatile anesthetics, L187

in tracheal smooth muscle, pH_i effects on, role in CO_2 regulation of airway tone, L642

Calcium ion

see also **Potassium channels, calcium-activated**

cytosolic, mobilization in mesothelial cells, L63

influx, in tannin-mediated arachidonic acid release from alveolar macrophages, L33

intracellular

of carotid body glomus cell, response to hypoxia, developmental changes, L801

effect of halothane on, L166

in sensitized airway smooth muscle, L739

in submucosal nasal gland acinar cells, acetylcholine-induced responses, L361

in tracheal epithelium, ozone effects on and mechanisms involved, L558

transients in airway smooth muscle cells (review), L1

relation to ATP-induced protein kinase C activity in type II cells, L108

Calcium signaling

in tannin-mediated arachidonic acid release from alveolar macrophages, L33

Calmodulin

activity in sensitized airway smooth muscle, L739

Calphostin C

effects on pulmonary vascular bed responses to vasoconstrictors, L532

Cancer, see Tumors**Capillaries**

hypoxia-stimulated network formation in pulmonary microvessel endothelial cells, L789

pulmonary, role of actin in maintenance of endothelial cell integrity, L753

Capsaicin

and effects of neurokinin depletion on antigen-induced pulmonary changes after sensitization, L781

Carbon dioxide

airway smooth muscle relaxation from, role of pH_i , L207

partial pressure, effects on K^+ -induced contractions in bronchial rings, L642

Carotid chemoreceptors (carotid bodies)

glomus cell [Ca^{2+}]_i response to hypoxia, developmental changes, L801

Catalase

activity in bronchial epithelial cells, effects of cytokines on, L71

effects on oxidant-induced changes in tracheal epithelium, L284

role in pulmonary hypoxic vasoconstriction, L546

Catecholamines

effects on acetylcholine release from equine airway parasympathetic nerves, L368

Cell adhesion

leukocyte-endothelial cells, in trachea, role of neurokinin receptors and relation to plasma leakage, L263

Cell migration

of bronchial epithelial cells, effects of cigarette smoke, L723

and hypoxia-stimulated capillary network formation in lung microvessel endothelial cells, L789

of neutrophils into bronchoalveolar fluid, effects of anti-cytokine-induced neutrophil chemoattractant antiserum, L245

virus effects on bronchial epithelial cell migration and matrix attachment, L214

Cells

in vitro culture systems, for human airway epithelial cells (review), L347

Cells, communication between, see Communication, intercellular**Cellular respiration**

and hypoxic inhibition of cytochrome-c oxidase, L918

Chemoattractants

in neutrophil, cytokine-induced, effects in lung inflammation, L245

Chemokines

C-X-C family vs. C-C family, stimulus- and cell-specific expression by pulmonary stromal cell populations, L856

interleukin-8 and monocyte chemoattractant protein-1, mRNA expression in oxygen-injured lung, L826

Chemotaxis

eosinophilic, interleukin-8-induced, relation to respiratory allergy, L117

Chloramphenicol acetyltransferase reporter plasmids

and gene transfer by tracheal insufflation, L1052

Chloride ion

see also **Sodium-potassium-chloride cotransport**

transepithelial secretion, relation to submucosal glands in distal airways, L526

transport in human fetal distal lung, L270

Cholinephosphotransferase

in alveolar type II cells, effects of H_2O_2 , L129

Cholinergic nerves

of airway smooth muscle, role of α_2 - and β_2 -adrenoceptors, L368

Cholinergic neurotransmission

acetylcholine release from airway smooth muscle nerve endings, L432

and β -adrenergic agonist effects on acetylcholine release from tracheal parasympathetic nerves, L950

Cholinergic receptors

muscarinic, role in nasal gland acinar cell [Ca^{2+}]_i signaling, L361

Cigarette smoke

effects on bronchial epithelial cell migration and matrix attachment, L723

emphysema from, alveolar collagen breakdown and repair, L17

Collagen

alveolar, breakdown and repair in smoke-induced emphysema, L17

in early postnatal lung development, effects of indomethacin on, L56

type I

altered expression in lung exposed to 85% O_2 , L78

procollagen synthesis sites during human fetal lung development, L309

Collagen-binding receptors

integrins as, in fetal lung fibroblasts vs. epithelial cells, L136

Collagenase

pulmonary interstitial, expression in lung, effects of 85% O_2 , L78

Colony-stimulating factors

from alveolar cells, effects of surfactant protein A and endotoxin, alone and combined, L144

Communication, intercellular

cytokine-binding proteins in lung (review), L869

tracheal gap junction distribution, changes with postnatal development, L576

Complement proteins

changes in lung neutrophil kinetics from, pentoxifylline effects on, L27

Connective tissue

subepithelial deposition in asthma, and neuropeptide effects on lung fibroblasts, L278

Corticosteroids

see also **Glucocorticoids**

effects on epithelial cell secretory leukocyte protease inhibitor, L601

Cotton dust

lung disease from, tannin-mediated calcium influx in alveolar macrophages, and arachidonic acid release, L33

Cyclic nucleotides

airway smooth muscle relaxation from, role of sarcoplasmic reticulum Ca^{2+} ATPase, L407

non-role in anesthetic-induced airway smooth muscle relaxation, L166

Cyclin-dependent kinases

pulmonary activation during recovery from hyperoxia, L625

Cyclins

A- and D-type, pulmonary induction during recovery from hyperoxia, L625

Cyclooxygenase

constitutive and inducible isoforms, in alveolar vs. peritoneal macrophages, L294

Cyclooxygenase (continued)

effects of inhibition on eosinophil chemotaxis and airway narrowing, L446

role in anesthetic-induced airway smooth muscle relaxation, L166

Cyclooxygenase products

role in bronchial neuroeffector control and airway hyperresponsiveness, L47

Cystic fibrosis

α -adrenergic-stimulated NaCl(K) co-transport in airway epithelial cells, L414

distal airway transepithelial Cl⁻ secretion and submucosal gland number, L526

gene transfer, adenovirus-mediated, to bronchial submucosal glands, L657
possible therapy with butyrate-induced overexpression of Δ F508 mutant, L615

Staphylococcus aureus stimulation of airway epithelial cell interleukin-8 for neutrophil recruitment, L85

Cystic fibrosis transmembrane conductance regulator

Δ F508 mutant, butyrate-induced overexpression, L615

Cystine transport

in alveolar type II cells, L21

Cytidylyltransferase

in alveolar type II cells, effects of H₂O₂, L129

Cytochrome-c oxidase

inhibition during hypoxia, L918

Cytokine-binding proteins

in lung (review), L869

Cytokine-induced neutrophil chemoattractant

effects in lung inflammation, L245

Cytokines

early response vs. immune-associated, chemokines induced by, in pulmonary stromal cell populations, L856
induction of NO oxidation products in fetal type II cells, L501

superoxide dismutase induction in bronchial epithelial cells, effects on later oxidant exposure, L71

Cytoplasmic motility

of alveolar macrophages, in parainfluenza type I (Sendai) pneumonia, role of NO, L399

Cytoskeleton

role in pulmonary capillary endothelial cell configuration and barrier function, L753

D**Development, see Lung, development****Dexamethasone**

effects on pulmonary β_2 -adrenoceptor transcription rate, L41
effects on surfactant protein B gene transcription and mRNA stability in fetus, L481
effects on tropoelastin expression during fetal lung development, L491

Diacylglycerol

role in strain-induced fetal lung cell increase, L729

Diethylmaleic acid

effects on cystine transport and glutathione levels in alveolar type II cells, L21

Dihydropyridine

and voltage-dependent Ca²⁺ channel role in hypoxia-induced airway smooth muscle relaxation, L201

Disseminated intravascular coagulation

role in generating heme iron-derived reactive oxygen species, L321

DNA

see also **Gene transfer; Genes**

injury and repair after H₂O₂ exposure, in tracheal epithelial vs. mesothelial cells, L832

strand breaks in, relation to reactive oxygen species in asbestos-induced lung injury, L471

Dorsal root ganglion cells

effects on cultured airway epithelial cells, L957

E**Ear**

middle ear, oxidant-induced changes in transepithelial ion transport, L390

Edema

pulmonary

from botulinum C₂ toxin, role of endothelial cytoskeleton, L753

IL-1-induced, protective effects of prior IL-1, L12

Elastase

stimulation of secretory leukocyte protease inhibitor in airway cells, corticosteroid effects on, L601

Elastin

alveolar, role in smoke-induced emphysema, L17

fetal lung production, role of glucocorticoids in, L491

Emphysema

smoke-induced, alveolar collagen breakdown and repair, L17

ENA-78

expression by pulmonary stromal cell populations, L856

Endothelial cells

constitutive NO synthase gene expression, regulation during lung development, L589

interleukin-8-induced transcellular eosinophilic chemotaxis, L117

leukocyte adherence

in pulmonary artery, nucleotide-stimulated, role of ATP-binding proteins, L666

in trachea, role of neurokinin receptors and relation to plasma leakage, L263

neutrophil adherence, in pulmonary artery, nucleotide-stimulated, role of ATP-binding proteins, L666

pulmonary hemoglobin-induced heme oxygenase and ferritin induction, L321

role of actin in maintenance of integrity, L753

of pulmonary artery

barrier function, mechanisms of disruption by pertussis toxin, L926
chemokine expression by, L856
cultured human, effects of endotoxin on, L239

of pulmonary microvessels, hypoxia-stimulated capillary network formation, L789

xanthine dehydrogenase/xanthine oxidase in, effects of nitric oxide and cell redox status, L809

Endothelin receptors

ET_A

binding by endothelin-1 in alveolar epithelial cells, L192

role in hypoxia-induced pulmonary hypertension, L95

on tracheal epithelial cells, L424

ET_A and ET_B, antagonist effects in guinea pig airway, L846

subtypes present in newborn piglet pulmonary vasculature, L607

Endothelins

ET-1

endothelin receptor ET_A-type binding sites on tracheal epithelial cells, L424

role in hypoxia-induced pulmonary hypertension, L95

synthesis, receptors, and signal transduction in alveolar epithelium, L192

ET-3, effects on endothelin-1 binding to alveolar epithelial cells, L192

Endothelium

pulmonary, heme iron-derived reactive oxygen species in, L321

Endothelium-derived relaxing factor and leukotoxin-induced pulmonary vasodilation, L123**Endotoxin**

effects on cultured human pulmonary artery endothelial cells, L239

effects on endothelin-1 release by in alveolar epithelial cells, L192

effects on NO synthase induction in pulmonary artery smooth muscle, L509

induction of NO oxidation products in fetal type II cells, L501

induction of tumor necrosis factor in lung, ethanol effects on, L991

interactions with surfactant protein A in alveolar macrophages and type II cells, L144

intratracheal injection, effects on cytokine-induced neutrophil chemoattractant expression in lung, L245

lung injury from, effects on cGMP-mediated pulmonary vasorelaxation, L1029

Eosinophils

airway contraction from, measuring by computerized videomicroscopy, L519

chemotaxis in airways, effects of inhibiting 5-lipoxygenase and cyclooxygenase, L446

endothelial-cell adhesion in trachea, role of neurokinin receptors and relation to plasma leakage, L263

interleukin-8-induced chemotaxis through endothelium and epithelium, L117

Epidermal growth factor

cytokine-binding proteins in lung (review), L869
and pulmonary artery cell proliferation in normotensive vs. pulmonary hypertensive rats, L465

Epidermal growth factor receptor

and pulmonary artery cell proliferation in normotensive vs. pulmonary hypertensive rats, L465

Epithelial cells

of airway

see also **Alveolar cells, type II**

cAMP production and adenylate cyclase activity, tannin effects on, L851

ciliary motility, C-type natriuretic peptide effects on ciliary beat frequency, L1021

ciliary motility, nitric oxide-dependent, effects of TNF- α and IL-1 β , L911

human CC10 gene expression and evidence of link to asthma, L565
human, *in vitro* culture systems (review), L347

interleukin-8 from, *Staphylococcus aureus* stimulation for neutrophil recruitment, L85

proliferation in coculture with dorsal root ganglion cells, L957

secretory leukocyte protease inhibitor in, corticosteroid effects on, L601

of airway submucosal glands, adenovirus-mediated transgene delivery, L657

of alveoli

endothelin-1 synthesis, receptors, and signal transduction in, L192

induction of A- and D-type cyclins and cyclin-dependent kinases during recovery from hyperoxia, L625

of bronchi

cigarette smoke effects on migration and matrix attachment, L723

ciliary motility, ethanol effects on, role of nitric oxide, L596

cytokine-induced superoxide dismutase in, effects on later oxidant exposure, L71

fibronectin production, effects of insulin, L230

stimulatory effects of hepatocyte growth factor and changes in neoplasia, L1012

virus effects on migration and matrix attachment, L214

in fetal lung

adenovirus-mediated gene transfer in human fetal lung *ex vivo*, L839

bioelectric properties and chloride secretion, L270

integrins as collagen-binding receptors, L136

ion transport in, effects of mesenchymal-cell extracellular matrix, L762

interleukin-8-induced transcellular eosinophilic chemotaxis, L117

middle-ear SV40-transformed, oxidant-induced changes in ion transport, L390

pulmonary, asbestos-induced injury, role of reactive oxygen species and DNA strand breaks, L471

of trachea

α -adrenergic-stimulated NaCl(K) cotransport in, role of protein kinase C, L414

DNA injury and repair after H₂O₂ exposure, vs. mesothelial cells, L832

endothelin receptor ET_A-type binding sites for ET-1, L424

ozone effects on [Ca²⁺], and mechanisms involved, L558

of trachea and nasal polyps, α -adrenergic-stimulated NaCl(K) cotransport in, role of protein kinase C, L414

Epithelium

of airway, neuropeptide receptor distribution, L584

tracheal, barrier function, oxidant effects on permeability and repair, L284

Ethanol

effects on airway ciliary motility, role of nitric oxide, L596

effects on endotoxin-induced tumor necrosis factor and nitric oxide in lung, L991

Extracellular matrix

of fetal lung cells, effects on distal lung epithelial ion transport, L762

growth factors binding (review), L869

interaction with bronchial epithelial cells

effects of cigarette smoke, L723

virus effects on, L214

of type II pulmonary epithelial cells
role of adrenal hormone in synthesis, L885

turnover kinetics, L336

F**Fatty-acid synthase**

gene transcription in fetal lung, glucocorticoid stimulation and effects of retinoic acid on, L683

Ferritin

hemoglobin-induced induction in pulmonary endothelial cells, L321

Fetus

adenovirus-mediated gene transfer to lung *ex vivo*, L839

alternative-splicing expression of pulmonary tenascin, role of transforming growth factor- β , L173

constitutive endothelial NO synthase gene expression, regulation during lung development, L589

distal lung epithelium, bioelectric properties and chloride secretion, L270

gene transcription of pulmonary fatty-acid synthase, glucocorticoid stimulation and effects of retinoic acid on, L683

integrins as collagen-binding receptors, in lung fibroblasts vs. epithelial cells, L136

lung cells

alveolar type II, inflammatory mediator-induced nitrate and nitrite production in, L501

effect of O₂ dose on surfactant protein mRNA expression and phospholipid production, L818

extracellular matrix from, effects on distal lung epithelial ion transport, L762

strain-induced increase, role of phospholipases C and D and protein kinase, L729

lung development

dexamethasone effects on tropoelastin expression, L491

ontogeny of procollagen type I synthesis sites during, in humans, L309

surfactant protein B gene expression, roles of transcription and mRNA stability, L481

Fibroblast growth factor

basic

and its receptor, gene expression in lung after 85% O₂, L455

role in hypoxia-stimulated capillary network formation in lung microvessel endothelial cells, L789

cytokine-binding proteins in lung (review), L869

Fibroblasts

in fetal lung, integrins as collagen-binding receptors, L136

neuropeptide effects on proliferation and chemotaxis, L278

Fibronectin

and bronchial epithelial cell-matrix interactions after viral infection, L214

bronchial epithelial cell production, effects of insulin, L230

Free radicals

generation in bronchial epithelial cells, effects of cytokines on, L71

lung injury from, and inflammatory mediator-induced NO production by type II cells, L501

oxygen-derived, see **Reactive oxygen species**

peroxynitrite chemistry (review), L699

G**G protein-linked receptors**

in airway smooth muscle cells (review), L1

G proteins

coupling to calcium-activated K channels, effects on tracheal smooth muscle, L221

Gap junctions

tracheal distribution, changes with post-natal development, L576

Gene transfer

adenovirus-mediated

to bronchial submucosal glands, L657
to human fetal lung *ex vivo*, L839

lung-specific, by tracheal insufflation of plasmid DNA, L1052

Genes

alternative splicing, in expression of tenascin in fetal lung, role of transforming growth factor- β , L173

human CC10, sequence analysis, chromosomal locus, expression in airway epithelium, and link to airway disease, L565

surfactant protein B

in mouse, nucleotide sequence and comparison with human gene, L381

promoter characteristics, L674

Glands

submucosal, in distal airways, relation to transepithelial Cl⁻ secretion, L526

Glomus cells

of carotid bodies, $[Ca^{2+}]_i$ response to hypoxia, developmental changes, L801

Glucocorticoids

effects on pulmonary β_2 -adrenoceptor transcription rate, L41
effects on tropoelastin expression during fetal lung development, L491
stimulation of fatty-acid synthase gene transcription in fetal lung, effects of retinoic acid on, L683

Glucose-6-phosphate dehydrogenase

in bronchial epithelial cells, effects of cytokines on, L71

Glucose oxidase

effects on tracheal epithelial cell membrane conductance and permeability, L284

Glutathione

regulation in alveolar type II cells, L21

Granulocyte-macrophage colony-stimulating factor

cytokine-binding proteins in lung (review), L869

Growth factors, see specific factors**Guanosine 3',5'-cyclic monophosphate**

airway smooth muscle relaxation from, role of sarcoplasmic reticulum Ca^{2+} ATPase, L407
effects on airway cilia and electrolyte transport, L1021
levels in pulmonary artery smooth muscle, endotoxin effects on, L509
non-role in anesthetic-induced airway smooth muscle relaxation, L166
pulmonary vasorelaxation from, dysfunction in endotoxin-induced injury, L1029

Guanylate cyclase

role in pulmonary hypoxic vasoconstriction, L546

H**Halothane**

effects on tracheal smooth muscle force and $[Ca^{2+}]_i$, L166
effects on voltage-activated Ca^{2+} channels, L187

Heme iron

and reactive oxygen species in pulmonary vascular disorders, L321

Heme oxygenase

hemoglobin-induced induction in pulmonary endothelial cells, L321

Hemoglobin

as iron source for iron-derived reactive oxygen species in pulmonary endothelium, L321

Heparin

effects on pulmonary artery smooth muscle cell proliferation in normotensive vs. pulmonary hypertensive rats, L465

Hepatocyte growth factor

stimulatory effects on bronchial epithelial cells, changes in neoplasia, L1012

Histamine

airway smooth muscle cell proliferation from, vasoactive intestinal peptide effects on, L1047
effects on mesothelial cell $[Ca^{2+}]_i$, L63

Histamine H_1 receptors

role in antigen effects on bronchial parasympathetic ganglia, L879

Hydrogen peroxide

in bronchial epithelial cells, effects of prior cytokine-induced superoxide dismutase, L71
DNA strand breaks from, in pulmonary epithelial cells, L471
effects on surfactant biosynthetic enzymes in type II cells, L129
effects on tracheal epithelial cell membrane conductance and permeability, L284
oxidant damage from, DNA injury and repair after, in tracheal epithelial vs. mesothelial cells, L832
role in pulmonary hypoxic vasoconstriction, L546

Hydroxyl radicals

and peroxynitrite chemistry (review), L699
role in asbestos-induced pulmonary epithelial cell damage, L471

Hypercapnia

airway smooth muscle relaxation from, role of pH_i , L207
effects on K^+ -induced contractions in bronchial rings, L642

Hyperoxia

in bronchial epithelial cells, effects of prior cytokine-induced superoxide dismutase, L71
lung response to, interleukin-8 and monocyte chemoattractant protein-1 mRNA expression, L826
85% O_2
14 days of exposure, effects on type I collagen, transforming growth factor- β_1 , and related genes, L78
lung toxicity from, basic fibroblast growth factor and its receptor, gene expression in lung, L455
100% oxygen, effects of aging on survival time response, L539
pulmonary induction of A- and D-type cyclins and cyclin-dependent kinases during recovery, L625

Hyperplasia

of pulmonary artery smooth muscle cells, in normotensive vs. pulmonary hypertensive rats, L465

Hypersensitivity

antigen effects on bronchial parasympathetic ganglia, role of histamine H_1 receptors, L879

Hypertension, see Pulmonary hypertension**Hypocapnia**

effects on K^+ -induced contractions in bronchial rings, L642

Hypoxia

airway smooth muscle relaxation from, role of Ca^{2+} entry inhibition, L201
role of pH_i , L207
effects on atrial natriuretic peptide receptor gene expression in lung, L328
inhibition of cytochrome-c oxidase, L918
pulmonary hypertension from, role of lung endothelin-1, L95
pulmonary vasoconstriction from, effects of leukotoxin on, L123
role of NADPH oxidase, L747

roles of guanylate cyclase activation by NO and H_2O_2 -catalase, L546
response of carotid body glomus cell $[Ca^{2+}]_i$, developmental changes, L801
stimulation of capillary network formation in pulmonary microvessel endothelial cells, L789
ventilatory, effects of angiotensin receptor blockers on pulmonary vascular responses, L302

I**Immune system**

human CC10 gene, possible chromosomal linkage to atopy and IgE receptor, L565

Immunoglobulin receptors

for IgE, possible chromosomal linkage of human CC10 gene, L565

Indomethacin

cyclooxygenase inhibition from, effects on eosinophil chemotaxis and airway narrowing, L446
effects on early postnatal lung development, L56

Inflammation

acute pulmonary, effects of endotoxin, cytokine-induced neutrophil chemoattractant, and anti-CINC, L245
of airways, simultaneous study of chemoattraction and bronchoconstriction in guinea pig tracheal explants, L446
cyclooxygenase constitutive and inducible isoforms in alveolar vs. peritoneal macrophages, L294
human CC10 gene chromosomal locus and expression in airway epithelial cells, L565
leukocyte recruitment, stimulus- and cell-specific chemokine expression by pulmonary stromal cell populations, L856
mediators of, effects on inducible NO synthase gene expression in type II cells, L501
neurogenic, tracheal, role of neurokinin receptors in leukocyte-endothelial adhesion, L263
pulmonary
interleukin-8-induced transcellular eosinophilic chemotaxis, L117
surfactant protein A-endotoxin interactions, L144
Inflammatory airway disease

barrier function, mechanisms of disruption by pertussis toxin, L926
cultured human, effects of endotoxin on, L239
neutrophil adherence, nucleotide-stimulated, role of ATP-binding proteins, L666
endothelin receptor subtypes present in newborn piglets, L607

Pulmonary fibrosis

hyperoxic, 85% O_2 effects on type I collagen, transforming growth factor- β_1 , and related genes, L78

Pulmonary hypertension

hypoxia-induced
and atrial natriuretic peptide receptor gene expression in lung, L328
role of lung endothelin-1, L95
vascular smooth muscle cell proliferation in normotensive vs. pulmonary hypertensive rats, L465

Pulmonary microvasculature

neutrophil-mediated injury, pentoxifylline protection mechanisms, L27

Pulmonary surfactant, see Surfactant**Pulmonary vascular bed**

angiotensin peptide IV effects, vs. other vasoactive peptides, L302

Pulmonary vascular resistance

and constitutive endothelial NO synthase gene expression regulation during lung development, L589

Pulmonary vasorelaxation

guanosine 3',5'-cyclic monophosphate-mediated, dysfunction in endotoxin-induced injury, L1029

Pulmonary veins

endothelin receptor subtypes present in newborn piglets, L607

Purinceptors

and nucleotide-stimulated leukocyte adherence to pulmonary artery endothelial cells, L666

Pyrimidine nucleotide receptors

role in nucleotide-stimulated leukocyte adherence to pulmonary artery endothelial cells, L666

R

Reactive oxygen species

see also **Oxidant stress**

- effects on surfactant biosynthetic enzymes in type II cells, L129
- effects on transepithelial ion transport in middle ear SV40-transformed cell line, L390
- and endothelial cell xanthine dehydrogenase/xanthine oxidase activity, L809
- iron-derived, lung endothelial heme as source, L321
- lung injury from, pH-sensitive liposomes for antioxidant delivery to type II cells, L374
- role in asbestos-induced lung injury, relation to DNA strand breaks, L471

Receptors

see also *specific substances*

- in airway smooth muscle cells (review), L1

Redox status

- effects on endothelial cell xanthine dehydrogenase/xanthine oxidase, L809

Respiration

- brain stem nuclei controlling connections with sleep-causing pontine reticular regions, L251
- muscarinic receptor subtypes in, L941
- cellular, and hypoxic inhibition of cytochrome-c oxidase, L918

Respiratory diseases, see Allergy;**Asthma****Respiratory distress syndrome**

see also **Adult respiratory distress syndrome**

- in prematures, pH-sensitive liposomes for antioxidant delivery to type II cells, L374

Respiratory failure

- neonatal, from hereditary surfactant protein B deficiency, aberrant SP-C peptide, L647

Respiratory gases

- and airway smooth muscle relaxation, role of pH_i , L207

Respiratory syncytial virus

- effects on airway nonadrenergic noncholinergic inhibitory system, L1006

Retinoic acid

- effects on glucocorticoid stimulation of fatty-acid synthase gene transcription in fetal lung, L683

S

Sarcoplasmic reticulum

- calcium ATPase, role in cyclic nucleotide-induced airway smooth muscle relaxation, L407

Scavengers

- and peroxynitrite chemistry, L699

Second messengers

- in strain-induced fetal lung cell increase, L729

Secreted protein, acidic and rich in cysteine

- cytokine-binding proteins in lung (review), L869

Secretory leukocyte protease inhibitor

- in airway epithelial cells, corticosteroid effects on, L601

Selectins

- E-selectin, and cytokine-induced neutrophil chemoattractant effects in lung inflammation, L245

Sensory nerves

- C fiber, neuropeptides from, effects on airway epithelial cells, L957

Sevoflurane

- effects on tracheal smooth muscle voltage-activated Ca^{2+} channels, L187

Short-circuit current, see Ion transport**Signaling**

- transmembrane, α_1 -adrenergic-stimulated NaCl(K) cotransport in normal and cystic fibrosis airway epithelial cells, L414

Signaling pathways

- in strain-induced fetal lung cell increase, L729

Sleep

- respiratory depression during, and pontine reticular region connections with brain stem respiratory nuclei, L251

Smoking, see Cigarette smoke**Sodium chloride (potassium) cotransport**

- α -adrenergic-stimulated, in airway epithelial cells, role of PKC, L414

Sodium ion

- transepithelial transport in middle ear SV40-transformed cell line, oxidant-induced changes, L390

Sodium-potassium-ATPase

- modulation by β -adrenergic agonists in type II alveolar cells, L983

Sodium-potassium-chloride cotransport

- in airway smooth muscle, L551

Staphylococcus aureus

- stimulation of airway epithelial cell interleukin-8 for neutrophil recruitment, L85

Staurosporine

- effects on oxidant-induced changes in tracheal epithelium, L284
- effects on pulmonary vascular bed responses to vasoconstrictors, L532

Strain

- increase in fetal lung cells from, role of phospholipases C and D and protein kinase, L729

Stress

- physical, effects on airway smooth muscle contractile enzyme activity, L999

Stromal cells

- pulmonary, stimulus- and cell-specific chemokine expression, L856

Stromelysin

- expression in lung, effects of 85% O_2 , L78

Submucosal glands

- in distal airways, relation to transepithelial Cl^- secretion

Substance P

- effects on acetylcholine release from airway smooth muscle nerve endings, L432
- effects on human lung fibroblast proliferation and chemotaxis, L278

Substance P receptors

- NK-1-type, distribution in respiratory tract, L584

Superoxide anion

see also **Peroxyxynitrite**

- role in oxidant effects on tracheal epithelial barrier function, L284

Superoxide dismutase

- cytokine-induced in bronchial epithelial cells, effects on later oxidant exposure, L71
- delivery to pulmonary epithelial cells via surfactant protein A-carrying, pH-sensitive liposomes, L374

Surfactant

- biosynthesis, glucocorticoid-stimulated fatty-acid synthase gene transcription in fetal lung, retinoic acid effects, L683
- biosynthetic enzymes, effects of H_2O_2 in type II cells, L129
- clearance by alveolar macrophages, L772
- metabolic subtypes, small vesicles vs. tubular myelin, effects of α_1 -antitrypsin levels, L438
- secretion by type II cells, regulation by ATP, role of protein kinase C, L108

Surfactant convertase

- and effects of α_1 -antitrypsin levels on small vesicular vs. tubular myelin surfactant metabolic subtypes, L438

Surfactant phospholipid

- effect of oxygen dose on mRNA expression in fetal lung cells, L818

Surfactant proteins**SP-A**

- interactions with bacterial endotoxin in alveolar macrophages and type II cells, L144
- molecular advances (review), L162
- for targeting pH-sensitive, antioxidant-containing liposomes to pulmonary type II cells, L374
- uptake and metabolism by alveolar macrophages, L772

- SP-A, SP-B, SP-C, effect of oxygen dose on mRNA expression in fetal lung cells, L818

SP-B

- clearance from lung, L636
- developmental and hormonal gene expression, roles of transcription and mRNA stability, L481
- gene promoter characteristics, L674
- hereditary deficiency, aberrant SP-C peptide, L647
- mouse gene for, nucleotide sequence and comparison with human gene, L381

- SP-C, aberrant processing in hereditary SP-B deficiency, L647

T

Tachykinin receptors**NK₁**

- and acetylcholine release from airway smooth muscle nerve endings, L432
- role in neutrophil and eosinophil adhesion to tracheal endothelial cells, L263

Tannin

- in arachidonic acid release from alveolar macrophages, role of calcium influx, L33
- effects on cAMP production and adenylyl cyclase in airway epithelial cells, L851

Tenascin

alternative-splicing expression in fetal lung, role of transforming growth factor- β , L173

Tight junctions

role in oxidant effects on tracheal epithelial barrier function, L284

Tobacco, see Cigarette smoke**Trachea**

see also **Epithelial cells, tracheal;**

Muscle, smooth, airway

calcium-activated potassium channels, role in NO-mediated relaxation, L152

cyclic nucleotide-induced relaxation, role of sarcoplasmic reticulum Ca^{2+} ATPase, L407

effects of endotoxin, cytokine-induced neutrophil chemoattractant, and anti-CINC, L245

eosinophil chemotaxis in and narrowing of, effects of inhibiting 5-lipoxygenase and cyclooxygenase, L446

epithelial barrier function, oxidant effects on permeability and repair, L284

gap junction distribution, changes with postnatal development, L576

muscarinic receptors, subtype distribution and effects on adenyl cyclase, L101

neurogenic inflammation, role of neurokinin receptors in leukocyte-endothelial adhesion, L263

neutrophil recruitment by *Staphylococcus aureus* stimulation of airway epithelial cell IL-8, L85

parasympathetic nerves, acetylcholine release from

β -adrenoceptor effects on, L950

catecholamine effects on, L368

Transforming growth factors**TGF- β**

effects on endothelin-1 release by alveolar epithelial cells, L192

regulation of NO production in pulmonary smooth muscle cells by inhibiting NO synthase expression, L862

role in alternative-splicing expression of fetal lung tenascin, L173

role in insulin modulation of bronchial epithelial cell fibronectin production, L230

TGF- β_1 , expression in lung, effects of 85% O_2 , L78

TGF- β_1 and β_2

cytokine-binding proteins in lung (review), L869

Tropoelastin

expression during fetal lung development, effect of dexamethasone on, L491

Tumor necrosis factor- α

cytokine-binding proteins in lung (review), L869

effects on airway ciliary motility, L911

effects on endothelin-1 release by alveolar epithelial cells, L192

endotoxin-induced, in lung, ethanol effects on, L991

levels in bronchoalveolar lavage, effects of anti-cytokine-induced neutrophil chemoattractant antiserum, L245

superoxide dismutase induction in bronchial epithelial cells, effects on later oxidant exposure, L71

Tumors

malignant mesothelioma cells, urokinase receptor role in tumor cell mitogenesis and proteolysis, L972

stimulatory effects of hepatocyte growth factor on bronchial epithelial cells, L1012

U**Urokinase receptor**

role in tumor cell mitogenesis and proteolysis, L972

V**Vascular disorders**

and iron-derived reactive oxygen species, lung endothelial heme as iron source, L321

Vascular endothelial growth factor

cytokine-binding proteins in lung (review), L869

Vascular permeability

pertussis toxin disruption of pulmonary artery endothelial cell barrier function, L926

Vascular tone, pulmonary

and constitutive endothelial NO synthase gene expression regulation during lung development, L589

vasorelaxation, dysfunction in endotoxin-induced injury, L1029

Vasoactive intestinal peptide

effects on acetylcholine release from airway smooth muscle nerve endings, L432

effects on airway smooth muscle cell proliferation, L1047

effects on human lung fibroblast proliferation and chemotaxis, L278

Vasoactive intestinal peptide receptors

type I, distribution in respiratory tract, L584

Vasoconstriction

hypoxic pulmonary

effects of leukotoxin on, L123

role of NADPH oxidase, L747

Veins, see Pulmonary veins**Ventilation, see Respiration****Viral infection**

effects on bronchial epithelial cell migration and matrix attachment, L214

Viruses

adenovirus, as vector for gene transfer

to bronchial submucosal glands for

cystic fibrosis therapy, L657

to fetal lung cells, L839

parainfluenza type I (Sendai), lung infection from, cytoplasmic motility in alveolar macrophages, role of NO, L399

Volatile anesthetics

airway smooth muscle relaxation from, mechanisms, L166, L187

W**Wound healing**

hypoxia-stimulated capillary network formation in lung microvessel endothelial cells, L789

X**Xanthine dehydrogenase/xanthine oxidase**

in endothelial cells, effects of nitric oxide and cell redox status, L809

Xanthine-xanthine oxidase

effects on tracheal epithelial cell membrane conductance and permeability, L284

Z**Zymosan-activated serum**

induction of NO oxidation products in fetal type II cells, L501
